Great Basin Incident Commander Conference Call Agenda 2015	
	877-779-1564/564507#
Date: 9/13	Note taker: K. Stringer
GB MAC/GACC Coordinator: Agenda/Incident Commander Discussion Points: <u>Summarize the following in 4 min or less:</u> <ul style="list-style-type: none"> • Fire Size / % contained / # of people / Cost to date • Significant changes since the last 209 • BRIEF fire synopsis /Critical Incident Information (use Directional vs DIVS's) • Political Issues / Community Meetings • Closures / Evacuations / Public Safety Issues • Major Safety Concerns / Injuries / Accidents • Critical Resource Needs • Resources Available to Reassign/Share/Demob 	
Predictive Services:	<p>...HIGH RISK for Lightning Sunday for Western NV and Sierra Front...</p> <p>...HIGH RISK for Wind Monday Western NV and Sierra Front...</p> <p>...Much Cooler with Significant Precipitation Many Areas by Middle of Next Week...</p> <p>High pressure centered across the Great Basin will maintain much above normal temperatures for all areas one more day (Saturday), with record heat possible across much of Nevada. Afternoon RH will drop into the single digits across NV and 10-15% into ID/UT/WY, with overnight RH recovery increasingly poor as drier air moves into the region.</p> <p>Computer models suggest that mid level moisture will make its way into western/northwest Nevada, the Sierra Front and possibly into southern Idaho beginning late Sunday, bringing the potential for isolated thunderstorm activity. Lightning activity late Sunday and Sunday night may have only light rainfall amounts, especially north of Highway 50. In addition, SW winds will be increasing Monday ahead of a deepening low moving across Pac NW. Deeper moisture will likely move into the Great Basin early next week with more widespread, longer duration wetting rains across much of the region, as a low pressure moves across the area.</p>
GBCC Update:	5 fires / 178 acres / 334LFG <ul style="list-style-type: none"> • GBCC will be moving aircraft today for realignment of resources. This will be mostly with helicopters.
1 Fire: Tepee Springs IC: Wilcox/Chadwick	95,300/ 80% of objectives / 715 people / 24.1 <ul style="list-style-type: none"> • Continued growth on the NE side. • Completing contingency line • Few new flare ups due to the really dry weather • 100 deg on the fire yesterday – 8th day of drying • Expect fire activity

Appendix 7

	<ul style="list-style-type: none"> • Wanted to make sure crews will arrive in time before the wind • New resources available for reassignment • No injuries or accidents • Still some issues with • no
2 Fire: Eleven Mile IC: Bartel	<ul style="list-style-type: none"> • Not on the call
